

Hot Socio-Economic Topics for All Humans Living in the 21st Century

GMOs aka Genetically Modified Organisms

GMOs do not occur in nature. They are not natural.

Cross pollinated and hybridized plant species are not GMOs.

GMOs are created in a laboratory in a petri dish under a microscope.

The DNA of one organism is spliced with the DNA of another organism using a specific type of bacterium. The DNA splicing can be plant to plant. Animal to animal. Or plant to animal and vice versa.

An example of a GMO is the Arctic Strawberry. This GMO was developed by splicing the DNA of a strawberry with the DNA of an Arctic flounder.

The purpose of creation for this GMO was to create a strawberry that is not susceptible to frost.

Laboratory animals that have been ingesting GMO foods have been found riddled with tumors.

GMOs are in most fast food and processed foods today.

The company Monsanto is at the helm of the heavy advocacy and strong arming of GMO's.

Please research: Glyphosate (aka Roundup) being found in the breast milk of women and the cord blood of new born babies in North America, the company Monsanto, Percy Schmeiser vs. Monsanto, the 250,000 farmers in India who have ended their lives in the last ten (10) years after consistent GMO Monsanto corn crop failures. In addition to France and Germany, other European countries that have placed bans on the cultivation and sale of GMOs include Austria, Hungary, Greece, and Luxembourg. Poland has also tried to institute a ban, with backlash from the European Commission.

Hydraulic Fracturing (Fracking):

Fracking is a process used to remove natural gas from deep underground. A deep horizontal and then vertical hole is drilled into the earth. The hole is cased, and then a large amount of drinkable water is pumped down the hole along with sand and multiple chemicals. The hole is then put under a massive amount of pressure. This creates instability downhole. The end goal of fracking is for the particles of sand to enter into numerous cracks and fractures created by this process and release naturally occurring pockets of natural gas for capture.

Once the life of the frackhole is complete, the wastewater is removed and pumped into a wastewater containment system. Between the fracking process itself and the containment systems, somewhere along the way the casing breaks, disintegrates or degrades and the wastewater is released, eventually ending up in the ground water systems, aquifers and water tables of surrounding areas.

Fracking affects all life. Fracking uses astronomical amounts of water, poisons it and puts it back into the earth. All for something that we can definitely survive without. Man survived without it for thousands of years.

Please research: Fracking health effects. Hydrofracking. Bulgaria, France, Germany, and Ireland banning all fracking operations. Jessica Ernst vs. Encana. And water shortages due to fracking.

Geoengineering:

Geoengineering is a relatively newer term to the English language. Geoengineering is a technology used to modify the weather and Earth's atmosphere.

Chemicals have been released into the atmosphere at radical rates with the intention of arresting solar radiation, suppressing hail and mitigating greenhouse gases.

Chemicals being sprayed into the atmosphere are silver iodide, aluminum and barium to name a few.

There are no known studies on the long term effects of geoengineering on Earth or its life support systems.

Please research: Weather Modification, HAARP, Cloud Seeding, Silver Iodide, the Material Safety Data Sheet (MSDS) for silver iodide, Alberta's & Serbia's Hail Suppression Project, The Geoengineering Model Intercomparison Project (GeoMIP)

Geoengineering is a global issue.

The Banking System:

Within the countries of Canada and the United States there are few differences in our banking systems. The structures are the same, but Canada has the Bank of Canada and the USA has the Federal Reserve. The citizenry of both countries are battling the corruption and tyranny of the private banks. It is probable that North America is not alone in this.

The Banking System supports and enables the war machine and other foreign invasions, and the corruption of all levels of government and industry. They also hold humanity hostage via interest rates and debt slavery.

This is a huge topic so only terms of reference for research purposes will be presented here: The LIBOR Scandal, the 1%, Fractional Reserve Banking, Interest Rigging, Bank Bailouts, the IMF, the creation of BRICS and the World Bank.

Finally, according to the Bank of International Settlements, the global debt is \$100 Trillion USD. Please ask yourself whom that debt is owed to, and how that is even possible.

If you would like to print off your own copies please visit:

(please translate into your own primary language and distribute)

The Mainstream Media:

Interestingly enough, a very small number of corporations own the world's radio, newspapers, networks and TV stations.

The information we are given is manipulated and subjective, meant to incite a particular response from the audience, which is us!

Please research: The Citizen Disclosure Project and all Witnesses mentioned on their website, Architects & Engineers for 9/11 Truth, Project MK-Ultra and Operation Paperclip, Fukushima and Dr. Helen Caldicott to name a few.

Solutions for ALL topics mentioned:

First of all... Don't Panic! Just breathe ☺

We promise that being afraid and full of fear won't serve you or anyone else.

Just know that there are tens of thousands around the world that are working together to help each other and find solutions. You are not alone in exploring and holding all of this knowledge.

Research these topics on the internet and in your libraries and communities if you can, but don't stop there. There are so many things we wish we were able to share but these were of the utmost importance to relay as they all directly affect mankind's freedom, health and general well-being. Document everything you discover and share it with others. Reach out. Raise awareness. Write to your local papers. Talk to your community members. And then Organize!

Solutions for the Hot Topics

Geoengineering:

Test plant tissues around you that appear sickly. Publish the results. Many people all across the world have been documenting the damage occurring in the natural world due to the chemicals being sprayed into our atmosphere.

Demand transparency, demand accountability from everyone in government and within the industry. Demand that the pollution of our environment end.

The technologies we need that will save us do exist. There are better ways!

The only way they are able to do what is being done is because we have permitted it to happen. And not enough people know.

Hydraulic Fracking:

There are alternatives to natural gas AND oil. The profits of the natural resource mining industries do not outweigh humanity's right to live AND live healthily and vibrantly!

Technologies to explore: Rocket Thermal Mass Heaters, Rocket Stoves, solar water heaters, Hemp as a stand-alone energy industry, solar power, magnetic energy, and ocean current energy among so many others.

Paramount to that, it is vital that we protect any and all water sources around us including the one(s) within our communities. Assist and support those who are directly affected by the harm being caused by hydraulic fracking whether it is their health or their family farm at risk.

We need the waters and lands of this Earth to survive and THRIVE! So we can too!

The Banking System:

This is such a huge one. But, it begins with but a single step: get away from the big banks. Move every financial product you can to a Credit Union. Credit Unions are not banks. Carry cash; use as little plastic as possible. Billions are made off of our transaction fees for the banks every quarter. Read the fine print. You are not a loan. You are a human being. They do not own you. Become as self-reliant as possible. We the people have bailed them out time and time again. No more handouts to the banks!

Research: Credit Unions, barter and trade, resource based economies and gift economies.

GMOs:

Grow your own food if possible, collaborate with community or family members and build a garden, preferably indoors due to the effects of geoengineering by-products in the Earth's atmosphere. Focus on heirloom and open pollinated non-GMO seeds. Trade produce with others. Buy produce locally from Farmer's Markets. Remove fast foods and processed foods from your diet as much as possible. Take care of your health and the health of those you care for by eating as 'back to nature' as possible. Read labels and lobby governments to ensure that GMO foods are either labelled or banned from the human chain of nutritional consumption altogether.

The Mainstream Media:

WE have become the Media. We watch, research, take stock, consider and listen. We use our skills of discernment, critical thinking and logic. We look to citizens on the ground to share what is actually happening when things are taking place in this world. We know the media has an agenda. That is enough for us not to rely on it as a reliable source of information. Take pictures, use video. Document everything. And then share it with the rest of the world through grassroots or social media.

A Final Note:

These issues that affect all of humanity can be traced back to the corruption and collusion of the elite or rich and the government with industry.

It is possible to co-exist without tyranny and control. It is possible to work together to co-create new sustainable communities and a new world where all human beings can meet their needs in abundance. It is possible to live without government.

Please consider researching permaculture, aquaponics, cob homes and earth Ship Building, Sustainable Communities, the Venus Project, the Four Hour Work day and the UBUNTU party to name a few

There is vast abundance in this world. But it is being hoarded by those at the 'top' and the laws created by them stand in the way for many of us. And it's time to come together and co-create change.

The most important thing you need to know is that You Matter. You are Important. And you have meaning and purpose in this world.

Living a life of struggle, sickness, fear, scarcity, isolation and alienation is not it.

There are better ways.

And you have a right to a better life. You have a right to be a thriving part of this world. And you have a right to reach out for that.

Why?

Because you were born a human being.

It is as simple as that.

We know that we are intrinsically interconnected. We know that our well-being is linked to yours. And we are all in this together...

So please join us in the most epic journey of freedom in human history.

P.S. Did YOU know about any of this?

We didn't once. And our minds were so blown away. We are grateful that we could share it with you now. Thank you for listening and caring.

Sincerely,

Your Human Family from Around the World
